SUBJECT INDEX

Abortion, enzyme activities in amniotic fluid and maternal blood in cattle before and after induced foetal death and, 49; in sheep, 498
Age, effect of, on response of cattle to vaccination against foot-and-mouth disease, 17
Amniotic fluid and maternal blood, enzyme activities in, in cattle before and after induced foetal death and abortion, 49; in sheep, 498
Anaplasma centrale vaccine, comparative response of Friesian milking cows and calves to, 174
Antibiotic residues in milk, 9
Artificial insemination, a field study on the control of, and early pregnancy; milk progesterone in Finnish dairy cows, 297
Aujeszky's disease virus, quantitative evaluation of syncytium formation in cell culture by British isolates of, 151

Bank vole *(Clethrionomys glareolus)*, *Brucella abortus* infection in the, 397
Beecham mastitis series: antibiotic residues in milk, 9
Behaviour, the effect of different rearing systems on the development of calf, 249
Blood, an improved method for the isolation of a neutrophil-rich fraction from porcine, 355
Bovine leukosis virus infection, ear tattooing as a method of spread of, 647
Brain, responsiveness of the, following electrical stunning; sheep slaughtering procedures IV, 74
Broiler chickens, experimental infection of, with rotavirus, 69
Bromocriptine, the reproductive activity of autumn and spring-lambing ewes given during lactation, 282
Brucella abortus infection in the bank vole *(Clethrionomys glareolus)*, 397
Brucella abortus strain 19, the effect of reduced-dose, vaccination in accredited dairy herds, 507

Calf behaviour, the effect of different rearing systems on the development of, 249
Calves, comparative response of Friesian milking cows and, to *Anaplasma centrale* vaccine, 174
Calves, some effects of different rearing systems on health, cleanliness and injury in, 472
Camel in health and disease:
3. protozoal diseases of camels, 87
4. common ectoparasites of the camel and their control, 197
5. helminths of the camel, 315
6. infectious diseases of the camel: viruses, bacteria and fungi, 529
7. reproduction and genital diseases of the camel, 650
Campylobacter species, the effect of freezing semen and preputial flushings on subsequent examination for, 269
Carpus, disorders of the, in the dog I, 332; II, 435
Cat, notes on parasitic skin disease in the dog and, 447
Cattle:
comparative response of Friesian milking cows and calves to *Anaplasma centrale* vaccine, 174
control of flies (Diptera: *Muscidae*) on dairy heifers by Flectron ear-tags, 160
ear tattooing as a method of spread of bovine leukosis virus infection, 647
effect of age on response of, to vaccination against foot-and-mouth disease, 17
effect of different rearing systems on the development of calf behaviour, 249
effect of reduced-dose *Brucella abortus* strain 19 vaccination in accredited dairy herds, 507
electrolyte and protein levels in bovine tears, 169
enzyme activities in amniotic fluid and maternal blood in, before and after induced death and abortion, 49
four outbreaks of salmonellosis due to *Salmonella typhimurium* among, in one district in Denmark: case reports, 490
hormonal control of the bovine oestrous cycle. I, the natural cycle, 564
lameness in, investigational and diagnostic check lists, 27
lipid composition of bovine sebum and dermis, 34
milk progesterone in Finnish dairy cows: a field study on the control of artificial insemination and early pregnancy, 297
opsonic activity of whey and sera from heifers experimentally infected with *Streptococcus agalactiae*, 349
ovarian activity and uterine involution in post-partum dairy cows with mild and moderate fatty infiltration of the liver, 576
plasma progesterone concentrations in superovulated heifers determined by enzymeimmunoassay and radioimmunoassay, 409
prevalence of serum antibodies to *Moraxella bovis* in, in Nigeria, 643.
radioimmunoassay of oestradiol-17β in cow's milk after its extraction on sepharose-coupled antiserum: a study of specificity using high-pressure liquid chromatography, 416
relationship between phagocytosis and intracellular killing of *Staphylococcus aureus* by bovine neutrophils, 362
sex chromatin as a useful tool for detection of freemartinism in bovine twins, 42
Chickens, experimental infection of broiler, with rotavirus, 69
Chickens, occurrence of red-skin carcasses, 312

Coliform mastitis, factors involved in the epidemiology and control of *Streptococcus uberis* and, 635
Conception, subsequent, of the gilts, farrowing performance of gilts, performance of their piglets to weaning and, effects on; studies on rapeseed meal from different varieties of rape in the diets of gilts II, 592
Conception, effects on attainment of puberty, ovulation rate, and embryo survival of the first litter; studies on rapeseed meal from different varieties of rape in the diets of gilts I, 581
Corynebacterium bovis, the virulence of strains of, in the mammary gland of the mouse and the effect of corynebacterial mastitis on subsequent infection with *Staphylococcus aureus*, 519
Cyprus, Q-fever control in-recent progress, 427
Cystic ovarian follicles, experimental, plasma gonadotrophin levels in sows with, 28

DENMARK, four outbreaks of salmonellosis due to *Salmonella typhimurium* among cattle in one district: case reports, 490
Dermatology, diagnostic methods in, 463
Dermis and sebum, bovine, the lipid composition of, 34
Dogs:
approach to spinal disease in, 222
canine stifle, 109
canine testosterone concentrations in samples stored at room temperature, 308
conditions of the canine hip joint, 554
disorders of the carpus in the I, 332; II, 435
genome analysis of virulent and attenuated strains of canine parainfluenza virus, 192
notes on parasitic skin disease in the, and cat, 447

EAR tattooing as a method of spread of bovine leukosis virus infection, 647
Ectoparasites, common, of the camel and their control, 197
Editorial, 221, 331, 553
Embryo survival of the first litter, effects on attainment of puberty, ovulation rate, conception and; studies on rapeseed meal from different varieties of rape in the diets of gilts I, 581
Embryos, developmental abnormalities in cultured early porcine, induced by hyperthermia, 603
Embryos, observations on the development *in vitro* of early (13-day) and later (15-day) porcine, 378
Endometrium, porcine, observations on the survival *in vitro* of cultured explants of, 372
Endotoxin shock in the piglet: beneficial effects of serotonin antagonism, 179
Enzyme activities in amniotic fluid and maternal blood in cattle before and after induced foetal death and abortion, 49;in sheep, 498
Enzymeimmunoassay and radioimmunoassay, plasma progesterone concentrations in superovulated heifers determined by, 409
Enzymeimmunoassay of serum oestrone sulphate and its application to early pregnancy diagnosis in pigs, 60
Escherichia coli, a comparison of methods for demonstrating colonization in the small intestine of piglets by enterotoxigenic, 484
Ethology, applied, and animal welfare, *du-evidenz*, 245

FARROWING performance of gilts, performance of their piglets to weaning and subsequent conception of the gilts, effects on; studies on rapeseed meal from different varieties of rape in the diets of gilts II, 592
Flectron ear-tags, control of flies (Diptera: *Muscidae*) on dairy heifers by, 160
Flies (Diptera: *Musicdae*), control of, on dairy heifers by Flectron ear-tags, 160
Flies, muscid, the carriage of summer mastitis pathogens by, 618
Foetal death and abortion, enzyme activities in amniotic fluid and maternal blood in cattle before and after induced, 49; in sheep, 498
Foot-and-mouth disease, effect of age on response of cattle to vaccination against, 17
Freemartinism in bovine twins, sex chromatin as a useful tool for detection of, 42

GENITAL diseases and reproduction of the camel, 650
George Fleming Prize, 446
Gestation, the influence of a low-nutrient intake after mating on, and perinatal survival of lambs, 611
Gonadotrophin levels, plasma, in sows with experimental cystic ovarian follicles, 288
Growth promoter Zeranol, some aspects of the use of the, in ewe lambs retained for breeding III. Effect on plasma LH levels, 424

HEART, lung and liver lesions in adult red deer: a histopathological survey, 388
Heminths of the camel, 315
Hip joint, canine, conditions of the, 554
Horses, constraints imposed by infectious diseases on the import and export of, 234
Hyperthermia, developmental abnormalities in cultured early porcine embryos induced by, 603

ICHTHYOSIS in domestic animals: a review of the literature and a case report, 1
Ileum cannulation, the effect of terminal, on the performance of growing pigs, 186
Infectious bursal disease virus, comparison of virus neutralizing and precipitating antibodies to, and their effect on susceptibility to challenge, 146
Infectious bursal disease virus, the isolation of, from turkeys in England, 141
International animal traffic and disease: constraints imposed by infectious diseases on the import and export of horses, 234

LAMENESS in cattle — investigational and diagnostic check lists, 27
LH levels, effect on plasma: some aspects of the use of the growth promoter Zeranol in ewe lambs retained for breeding III, 424
Libyan fat-tailed ewe lambs, the mating of, 401
Light environment, the effect of, on post-partum reproductive activity and prolactin levels in two breeds of sheep, 272
Lipid composition of bovine sebum and dermis, 34
Liver, lung and heart lesions in adult red deer: a histopathological survey, 388
Liver, mild and moderate fatty infiltration of the, ovarian activity and uterine involution in post-partum cows with, 576
Lung, heart and liver lesions in adult red deer: a histopathological survey, 388
Lungs, characterization of mycoplasmas isolated from pneumonic sheep, in Sudan, 82

MASTITIS, coliform, factors involved in the epidemiology and control of *Streptococcus uberis* and, 635
Mastitis pathogens, the carriage of summer, by muscid flies, 618
Mastitis, the virulence of strains of *Corynebacterium bovis* in the mammary gland of the mouse and the effect of coryne-

bacterial, on subsequent infection with *Staphylococcus aureus*, 519
Mating of Libyan fat-tailed ewe lambs, 401
Milk, antibiotic residues in, 9
Milk progesterone in Finnish dairy cows: a field study on the control of artificial insemination and early pregnancy, 297
Milk, radioimmunoassay of oestradiol-17β in cow's, after its extraction on sepharose-coupled antiserum: a study of specificity using high-pressure liquid chromatography, 416
Moraxella bovis in cattle in Nigeria, prevalence of serum antibodies to, 643
Moraxella bovis, the use of immuno-peroxidase techniques for the identification of, in tissue sections, 195
Mouse, the virulence of strains of *Corynebacterium bovis* in the mammary gland of the, and the effect of corynebacterial mastitis on subsequent infection with *Staphylococcus aureus*, 519
Mycoplasmas, characterization of, isolated from pneumonic sheep lungs in Sudan, 82
Myocardial disease in small animals, 342

NEUTROPHIL-rich fraction from porcine blood, an improved method for the isolation of a, 355
Neutrophils, bovine, the relationship between phagocytosis and intracellular killing of *Staphylococcus aureus*, 362
Nigeria, prevalence of serum antibodies to *Moraxella bovis* in cattle in, 643

OESTRADIOL-17β, radioimmunoassay of, in cow's milk after its extraction on sepharose-coupled antiserum: a study of specificity using high-pressure liquid chromatography, 416
Oestrone sulphate, an enzymeimmunoassay of serum, and its application to early pregnancy diagnosis in pigs, 60
Oestrous cycle, bovine, hormonal control of the, 564
Ovarian activity and uterine involution in post-partum dairy cows with mild and moderate fatty infiltration of the liver, 576
Ovulation rate, effects on attainment of puberty, conception and embryo survival of the first litter; studies on rapeseed meal from different varieties of rape in the diets of gilts I, 581

PARAINFLUENZA virus, canine, genome analysis of virulent and attenuated strains of, 192
Parasitic skin disease, notes on, in the dog and cat, 447
Perinatal survival of lambs, the influence of a low-nutrient intake after mating on gestation and, 611
Piglet, endotoxin shock in the: beneficial effects of serotonin antagonism, 179
Piglets to weaning, performance of their, farrowing performance of gilts and subsequent conception of the gilts: studies on rapeseed meal from different varieties of rape in the diets of gilts II, 592
Pigs:
- a comparison of methods for demonstrating colonization in the small intestine of piglets by enterotoxigenic *Escherichia coli*, 484
- an enzymeimmunoassay of serum oestrone sulphate and its application to early pregnancy diagnosis, 60
- an improved method for the isolation of a neutrophil-rich fraction from porcine blood, 355
- developmental abnormalities in cultured early porcine embryos induced by hyperthermia, 603
- effect of terminal ileum cannulation on the performance of growing pigs, 186
- endotoxin shock in the piglet: beneficial effects of serotonin antagonism, 179
- observations on the development *in vitro* of cultured explants of porcine endometrium, 372
- plasma gonadotrophin levels in sows with experimental cystic ovarian follicles, 288
- studies on rapeseed meal from different varieties of rape in the diets of gilts I. Effects on attainment of puberty, ovulation rate, conception and embryo survival of the first litter, 581; II. Effects on farrowing performance of gilts, performance of their piglets to weaning and subsequent conception of the gilts, 592

Pregnancy detector, evaluation of an ultrasonic, 515
Pregnancy diagnosis, early, in pigs, an enzymeimmunoassay of serum oestrone sulphate and its application to, 60
Pregnancy, early, a field study on the control of artificial insemination and: milk progesterone in Finnish dairy cows, 297
Pregnant ewes, the effect of sodium monesin on, 628
Progesterone concentrations, plasma, in superovulated heifers determined by enzymeimmunoassay and radioimmunoassay, 409
Progesterone, milk, in Finnish dairy cows: a field study on the control of artificial insemination and early pregnancy, 297
Prolactin levels and post-partum reproductive activity, the effect of light environment on, in two breeds of sheep, 272
Protozoal diseases of camels, 87
Puberty, effects on attainment of, ovulation rate, conception and embryo survival of the first litter; studies on rapeseed meal from different varieties of rape in the diets of gilts I, 581

Q-FEVER control in Cyprus — recent progress, 427

RADIOIMMUNOASSAY and enzymeimmunoassay, plasma progesterone concentrations in superovulated heifers determined by, 409
Radioimmunoassay of oestradiol-17β in cow's milk after its extraction on sepharose-coupled antiserum: a study of specificity using high-pressure liquid chromatography, 416
Rapeseed meal, studies on, from different varieties of rape on the diets of gilts I. Effects on attainment of puberty, ovulation rate, conception and embryo survival of the first litter, 581; II. Effects on farrowing performance of gilts, performance of their piglets to weaning and subsequent conception of the gilts, 592
Rearing systems, some effects of different, on health, cleanliness and injury in calves, 472
Rearing systems, the effect of different, on the development of calf behaviour, 249
Red deer, lung, heart and liver lesions in adult: a histopathological survey, 388
Red-skin chicken carcasses, the occurrence of, 312
Reproduction and genital disease of the camel, 650
Reproductive activity of autumn and spring-lambing ewes given bromocriptine during lactation, 282
Reproductive activity, post-partum, and prolactin levels, the effect of light environment on, in two breeds of sheep, 272
Rotavirus, experimental infection of broiler chickens with, 69

SALMONELLA typhimurium, four outbreaks of salmonellosis due to, among cattle in one district in Denmark: case reports, 490
Salmonellosis, four outbreaks of, due to *Salmonella typhimurium* among cattle in one district in Denmark: case reports, 490
Sebum and dermis, bovine, the lipid composition of, 34
Semen and preputial flushings, the effect of freezing, on subsequent examination for *Campylobacter* species, 269
Semen collection, studies on, in waterfowl by electrical stimulation, 265
Sex chromatin as a useful tool for detection of freemartinism in bovine twins, 42
Sheep:
- basic immunoenzymatic test which detects early acute and progressive destructive processes in, by tissue-associated protein complex, 129
- characterization of mycoplasmas isolated from pneumonic

sheep lungs in Sudan, 82
counter-immunoelectrophoresis for rapid diagnosis of sheep pox, 124
effect of light environment on post-partum reproductive activity and prolactin levels in two breeds of, 272
effect of sodium monensin on pregnant ewes, 628
enzyme activities in amniotic fluid and maternal blood in, before and after induced foetal death and abortion, 498
influence of a low-nutrient intake after mating on gestation and perinatal survival of lambs, 611
mating of Libyan fat-tailed ewe lambs, 401
observations on watery mouth in newborn lambs, 135
reproductive activity of autumn and spring-lambing ewes given bromocriptine during lactation, 282
slaughtering procedures IV. Responsiveness of the brain following electrical stunning, 74
some aspects of the use of the growth promoter Zeranol in ewe lambs retained for breeding III. Effect on plasma LH levels, 424
Slaughtering procedures, sheep IV. Responsiveness of the brain following electrical stunning, 74
Small animals, myocardial disease in, 342
Sodium monensin, the effect of, on pregnant ewes, 628
Spinal disease, the approach to, in dogs, 222
Staphylococcus aureus, the relationship between phagocytosis and intracellular killing of, by bovine neutrophils, 362
Staphylococcus aureus, the virulence of strains of *Corynebacterium bovis* in the mammary gland of the mouse and the effect of corynebacterial mastitis on subsequent infection with, 519
Streptococcus agalactiae, the opsonic activity of whey and sera from heifers experimentally infected with, 349
Streptococcus uberis, factors involved in the epidemiology and control of, and coliform mastitis, 635
Sudan, characterization of mycoplasmas isolated from pneumonic sheep lungs in, 82

TATTOOING, ear, as a method of spread of bovine leukosis virus infection, 647
Tears, electrolyte and protein levels in bovine, 169
Testosterone, canine, concentrations in samples stored at room temperature, 308
Theileria annulata, artificial infection of ticks with, 84
Ticks, artificial infection of, with *Theileria annulata*, 84
Turkeys, the isolation of infectious bursal disease virus from, in England, 141
Twins, bovine, sex chromatin as a useful tool for detection of freemartinism in, 42

UTERINE involution and ovarian activity in post-partum dairy cows with mild and moderate fatty infiltration of the liver, 576

VETERINARY professional development series:
approach to spinal disease in dogs, 222
canine stifle, 109
conditions of the canine hip joint, 554
diagnostic methods in dermatology, 463
disorders of the carpus in the dog I, 332; II, 435
hormonal control of the bovine oestrous cycle I. The natural cycle, 564
myocardial disease in small animals, 342
notes on parasitic skin disease in the dog and cat, 447

WATERFOWL, studies on semen collection in, by electrical stimulations, 265
Waterymouth, observations on, in newborn lambs, 135
Welfare, animal, and applied ethology, *du-evidenz*, 245

BOOK REVIEWS

ADVANCES in veterinary immunology (F. Kristensen & D. F. Antczak), 218
Advances in veterinary immunology 1983 (F. J. Bourne & N. T. Gorman), 330
Animal language (M. Bright), 327
Birds — their structure and function (A. S. King & J. McLelland), 548
British veterinary profession 1791–1948 (I. Pattison), 329
Calf husbandry, health and welfare (J. A. F. Webster), 434
Current techniques in small animal surgery (M. H. Bojrab), 108
Current veterinary therapy VIII (R. W. Kirk), 549
Developments in animal and veterinary science 17, safety and quality in food, 433
Diseases of the cat and their management (C. T. Wilkinson), 662
Environmental management in animal agriculture (S. E. Curtis), 550
General veterinary pathology (R. G. Thomson), 660
Handbook of medical feed additives 1984 (B. Cooke), 328
Handbook of veterinary neurologic diagnosis (J. E. Oliver & M. D. Lorenz), 217
Immunity to parasites (D. Wakelin), 660
Impact of diseases on livestock production in the tropics (H. P. Riemann & M. J. Burridge), 551
Indicators relevant to animal welfare (D. Schmidt), 327
Introduction to the functional anatomy of the limbs of the domestic animals (G. C. Skerritt & J. McLelland), 432
Manipulation of growth in farm animals (J. F. Roche & D. O'Callaghan), 219
Nutrition and behaviour in dogs and cats (R. S. Anderson), 107
Penguin book of dogs (R. Caras & M. Findlay), 107
Planned beef production (D. Allen & B. Kilkenny), 328
Plant poisoning in animals (M. R. Hails & T. D. Crane), 330
Poisonous plants in Britain and their effects on animals and man (M. R. Cooper & A. W. Johnson), 330
Poultry health and management (D. Sainsbury), 549
Report of the Houghton Poultry Research Station (B. M. Freeman), 106
Reproduction in the dog and cat (I. V. J. Christiansen), 661
Stunning of animals for slaughter (G. Eikelenboom), 329
Veterinary anaesthesia (L. W. Hall & K. W. Clarke), 218
Veterinary anesthesia (W. V. Lumb & E. Wynn Jones), 432
Veterinary clinical diagnosis (W. R. Kelly), 548
